Multi-Purpose Shipping Container Safety Tool

Our multipurpose Shipping Container Safety Tool generates great value in addition to the safety and savings our tool provides to trucking companies, their safety departments, along with insurance companies, reducing workman's comp claims.

Door Latch Handle Extender

As a Door Latch Handle Extender, it is a safety leverage bar to assist the driver operator in opening and closing shipping container doors. Great for opening and closing shipping and cargo container trailers that are rusted or frozen shipping container doors!

Door Latch Handle

Tire Thumper

The Tire Thumper function assists the driver operator in a quick method of evaluating properly inflated tires for truck driver safety. Properly inflated tires make a loud, sharp thud. Poorly inflated tires make a dull thud!

Tire Thumper

5th Wheel Release Tool

The Fifth Wheel Release Hook assists the driver in releasing the fifth wheel which can cause neck, shoulder and back injury as well as, damaging your clothes with grease, oil, and road grime. This pull hook will eliminate these problems.

Aside from being a shipping container safety hand leverage tool, tire thumper, and 5th wheel pull hook, it also serves as a container seal breaker, cam pin compressor, headache rack tool, and more!

5th Wheel Release

Container Seal Breaker

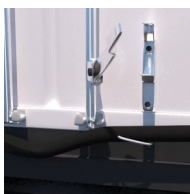

OPNBar also acts as a Shipping Container Seal Breaker, for plastic and metal, which can eliminate the need for wire cutters when on the go.

Seal Breaker

Cam Pin Compressor

OPNBar also acts as a Shipping Container or Trailer Cam Pin Compressor, for misaligned cams and keepers. Placing OPNBar underneath the cam can give leverage to align the cam with the keeper.

Cam Pin Compressor

Headache Rack Tool

OPNBar also acts as a Headache Rack Tool for stuck latches. The groove in the OPNBar tool can fit over headache rack latches when difficult to turn them.

Headache Rack Tool

Did You Know?

Did you know that trucking, cargo, warehouse, and insurance companies lose billions of dollars a year due to operator injury? Studies show that 50% of all trucking injuries in the workplace are due to sprains and strains. To help offset these unwanted expenses the company created OPNBar™, a multipurpose shipping container safety leverage tool, tire thumper, 5th wheel release hook, container seal breaker, cam pin compressor, headache rack tool, and more.

Compatibility

Designed to fit and extend the door latch handles on side by side doors found on the following units with the safety of the driver, operator, and worker foremost in mind:

- Dismountable and Refrigerated Shipping Cargo Container Trailers
- Semitrailer Refrigerated and Dry Freight Cargo Vans

Built to Last

- Safety tool rated up to 53k PSI
- 3 layers of rust inhibitors
- Plastic vinyl handle
- Anti-corrosive to gas and oil, helps operators hands from slipping
- Quality materials, quality control, and made in the USA. MADE IN THE USA with AMERICAN STEEL, AMERICAN STANDARDS, and AMERICAN LOVE.

Experience Safety and Productivity Using Our Shipping Container Leverage Safety Tool

The concept of Shipping Container Safety International's marquee product, "OPNBar™", was created to solve the issue of opening and closing shipping container doors, in addition to other safety functions.

Over time, container doors become difficult to open and/or close as a result of exposure to frigid conditions, oceanic transport, or simple wear and tear. Not only did the company find that shipping containers were difficult to open/close for most operators, it was also discovered that many operators have been prone to or suffered injury.

This intermodal container cargo inspection tool and leverage safety bar is to aid in opening and closing side-by-side doors found within Dismountable Shipping Cargo Container Trailer Transportation Industries (Railroad, Harbor, and Trucking Industries).

It is the perfect instrument to assist the driver or yard worker in opening and closing of frozen shipping container doors and locking mechanisms found on conventional style (side by side) doors, allowing opening and closing of frozen shipping container doors a great deal easier.
