COMPANY BACKGROUND

One Resiliency 365 LLC is a brand new company that specializes in development of Emergency Management Programs for local and Non Government Organizations, Civic Organizations and specialty organizations such as Home Owner Associations and other special operating companies that specialize in various levels of community and society programs for the greater good of overall society.

The Mission is to be ready at every level and to be resilient before, during and after disaster strikes. Our team has decades of experience in working at the local level of government. Disasters start at the local level and stay at the local level throughout the life cycle of a disaster. Let One Resiliency 365 LLC be there to assist in what ever level of an Emergency Management Program you may need.

PERFORMANCE HISTORY

As the owner of One Resiliency 365 LLC, I have over 23 years of in the trenches experience working at local, state and federal levels of government. For the past three years I have worked in the commercial world and understand the challenges that come from private industry and government programs making one. Along with me I have a cadre of personnel that I have worked with over my 20 year career who bring a wealth of knowledge to help round the program. We are progressive in our approach as we are all out of the box thinkers and no problem to big that it cannot be addressed.
