

Capabilities Statement

Millennium Information Systems (MIS) is a progressive full-service IT firm located in Poughkeepsie, New York. We have joyfully successfully provided comprehensive IT consulting support to individuals, small businesses, and public libraries, as well as local government for the past ten years. **MIS** was created specifically to provide a cost-effective alternative to larger high priced impersonal firms. We partner with our clients and learn how they work so that we can customize solutions according to their unique individual needs.

It is our goal to build lasting relationships. We want our clients to know we are here for the long haul and all of their problems, big or small, are important regardless of the size of their organizations. With a technical background that started with missile guidance systems and has gone on to include heavy computing environments, and systems integration, there is ample working experience to effectively provide a full-service experience for all our clients.
