Past Performance

Aerospace Industry – Boeing Philadelphia

(V22 & CH47 Aircraft and Composite Center of Excellence (CCoE) Program Objectives)

Provided comprehensive oversight and consultation in project management, business analysis, industrial engineering, and quality management systems, encompassing tasks such as defining project charters, forecasting estimates, analyzing operational requirements, establishing quality assurance plans, and implementing process improvement initiatives to optimize efficiency, reduce costs, and ensure compliance with regulatory standards in aircraft manufacturing and assembly.

Medical/Health Industry

(Packaging, Biotechnology, and Pharmaceutical Disciplines)

Provided comprehensive oversight and consultation in project management for B. Braun Medical Inc and Amgen Inc, ensuring compliance with regulatory standards, developing project plans, managing teams, and implementing quality control measures for qualifying and validating instrumentation, software installations, drug product assembly, packaging, and change control management in accordance with ISO, QMS, FDA, and EU guidelines.

Military Department of Defense (DOD - US Airforce)

(McGuire AFB, New Jersey, and Ramstein Air Base, Germany)

Provided comprehensive oversight and consultation in metrology management, resource management, and production control, ensuring adherence to precision measurement standards, traceability to national institutes, QMS certification criteria, and budgetary allocations while coordinating procurement, fiscal program activities, financial compliance, scheduling, and supply support for a wide range of equipment, personnel, and aircraft.
