

CAPABILITY STATEMENT

Core Competencies

BT Constructors, LLC is an experienced and dedicated construction firm specializing in oil and gas infrastructure. With a proven track record of successfully delivering high-quality projects, we are now expanding our expertise to provide comprehensive contracting services to federal, state, and local government agencies. We are committed to supporting government initiatives related to energy infrastructure, ensuring project success through technical proficiency, safety, compliance, and a customer-centric approach.

- **Oil & Gas Construction:** Pipeline installation, well pad development, storage tanks, oil stations, terminals, pump/compressor stations, and site preparation.
- **Government Contracting & Compliance:** Familiarity with FAR/DFARS, safety and environmental regulations, security clearance, and government procurement processes.
- **Maintenance & Support:** Ongoing facility maintenance, emergency response, equipment upgrades, and preventive maintenance.
- **Environmental & Safety Management:** Environmental compliance, safety planning, and risk assessments, maintaining an incident-free safety record.

Past Performance

Pipeline Installations for Private Sector: Successfully completed a multi-million-dollar pipeline installation project for a leading energy provider, focusing on efficiency and safety, on time and under budget.

Oil Storage Facility Construction: Led the construction of a state-of-the-art oil storage terminal that adhered to all industry safety and environmental standards, meeting the client's demanding timeline.

Guardrail Repair: Successfully completed guardrail repair projects at 200 different sites for the Texas Department of Transportation.

Differentiators

Industry Expertise: In-depth knowledge of oil and gas infrastructure and operations.

Government Contracting Focus: New to government contracting but experienced in adhering to procurement processes and compliance.

Skilled Workforce: Experienced team capable of scaling for government projects.

Safety Leadership: Zero-incident safety record with strict compliance to environmental and government regulations.
