

Business Summary

Founded by Peter Banks in 2021, PB IT Services, LLC provides computer sales and services of PCs, Networks, Printers and Phones.

We also handle low voltage wiring for companies that depend on reliable technology to succeed.

While enhancing our business solutions and service agreements, developing long-term connections with our clients and business partners, and offering competitive pricing on our goods and services are all goals of ours. Our first concern has always been providing excellent client service, thus we provide IT solutions and services that optimize their happiness. All of our leaders and teams are structured, relationship-focused, and future-focused.

Our Mission

PB IT Services focuses on integrity, professionalism, and establishing lasting relationships.

Our staff strives to provide exceptional duty of care to every client and actively contribute to the growth of the sector by establishing better standards of quality and service.

In order to meet the demands and requirements of our customers and assure remarkable results, we create creative and high-quality solutions. In order to give our clients the best IT solutions, we strive to maintain quality control by keeping an eye on our operations and processes. Our goal is to build long-lasting relationships with our clients and business partners while operating with morality, equity, and honesty.
